

You have a sequence of strings, and you'd like to determine the most frequently occurring string in the sequence. It can be only one.

Input: non empty list of strings.

Output: a string.

Example:

```
1 most_frequent([
2     'a', 'b', 'c',
3     'a', 'b',
4     'a'
5 ]) == 'a'
6 most_frequent(['a', 'a', 'bi', 'bi', 'bi']) == 'bi'
```
