

In a given list the last element should become the first one. An empty list or list with only one element should stay the same

[, 2, 3, 4, 1]

Input: List.

Output: Iterable.

Example:

```
1 replace_last([2, 3, 4, 1]) == [1, 2, 3, 4]
2 replace_last([1, 2, 3, 4]) == [4, 1, 2, 3]
3 replace_last([1]) == [1]
4 replace_last([]) == []
```
