

In a given list the first element should become the last one. An empty list or list with only one element should stay the same.

[1, 2, 3, 4, 

Input: List.

Output: Iterable.

Example:

```
1 replace_first([1, 2, 3, 4]) == [2, 3, 4, 1]
2 replace_first([1]) == [1]
```
