

Check if a given string has all symbols in upper case. If the string is empty or doesn't have any letter in it - function should return True.

**Input:** A string.

**Output:** a boolean.

**Example:**

```
1 is_all_upper('ALL UPPER') == True
2 is_all_upper('all lower') == False
3 is_all_upper('mixed UPPER and lower') == False
4 is_all_upper('') == True
5 is_all_upper('444') == True
6 is_all_upper('55 55 5') == True
```

**Precondition:** *a-z, A-Z, 1-9 and spaces*
