

In a given text you need to sum the numbers while excluding any digits that form part of a word.

The text consists of numbers, spaces and letters from the English alphabet.

Input: A string.

Output: An int.

Example:

```
1 sum_numbers('hi') == 0
2 sum_numbers('who is 1st here') == 0
3 sum_numbers('my numbers is 2') == 2
4 sum_numbers('This picture is an oil on canvas '
5 'painting by Danish artist Anna '
6 'Petersen between 1845 and 1910 year') == 3755
7 sum_numbers('5 plus 6 is') == 11
8 sum_numbers('') == 0
```
