

You have a string that consist only of digits. You need to find how many zero digits ("0") are at the beginning of the given string.

**Input:** A string, that consist of digits.

**Output:** An Int.

**Example:**

```
1 beginning_zeros('100') == 0
2 beginning_zeros('001') == 2
3 beginning_zeros('100100') == 0
4 beginning_zeros('001001') == 2
5 beginning_zeros('012345679') == 1
6 beginning_zeros('0000') == 4
```

**Precondition:** 0-9
